

Table of contents

Organising Committee	7
Organisers and sponsors of the conference	11
Part 1. Key problems of debris flow science and practice <i>(keynote presentations)</i>	13
Yu.B. Vinogradov Debris flows and similar phenomena: main fundamental and applied problems of the first quarter of the 21st century	15
K-F. Liu, Y.-C. Hsu Study on the sensitivity of parameters relating to debris flow spread	19
F. Wei, K. Hu, Y. Zhang, S. Jia Numerical simulation of debris flow movement and its application in debris flow risk zoning	23
J. Hübl, J. Suda Debris flow mitigation measures in Austria	27
Part 2. Debris flow disasters	31
A.M. Aleynikova Periglacial landscapes of the Mt. Elbrus region as a zone of catastrophic debris flow formation	33
P. Valderrama, L. Fidel, B. Zavala, L. Medina Dynamic of the 17 th January 1945 debris flow in Chavín de Huantar, Ancash, Peru	37
V.A. Droznin, V.N. Dvigalo, Y.D. Muravyev The landslide of 3 June 2007 in the Valley of Geysers on Kamchatka Peninsula	41
N.A. Kazakov, Y.V. Gensiorovskiy The debris flows of catastrophic volume in low mountains of Sakhalin Island	45
A.A. Lukashov Phenomenon of debris flows of erosional-tectonic genesis in the Baikal Rift Zone	49
Xie H., Li Y. Landslide-induced debris flow disaster in Biaoshuiyan Gully, Sichuan, China	53
Part 3. Assessment of debris flow risk	
A.Y. Barinov, E.V. Ash Geomorphological analysis of debris flow hazard due to torrential rainfalls: case study of coastal morphosystems at the Black Sea coast	59
P.-S. Lin, J.-H. Lee Risk assessment of potential debris flows in the watershed of Chen-Yu-Lan River	62

D. Ma, H. Huang, H. Xie, D. Zhong Some characteristics of debris flow hazards in mountain urban areas, China	66
T.Ye. Mirtskhulava Forecast of vulnerability of objects to debris flow impact and perspective directions of research	70
E.A. Talanov Debris flow risk: theoretical basis and practical significance	74
R.O. Ter-Minasyan Forecasting of risk of debris flow watercourses in Armenia	78
Part 4. Debris flow activity and climate change	81
M. Bollschweiler, M. Stoffel, D.M. Schneuwly Assessing the last moment of debris-flow activity on a cone using tree-ring data	83
Y.Y. Wang, B. Tian, C.-D. Jan, Y. Hong, R.Y. Zou Analysis of relations between the rainfall trends and eroded sediment transport of debris flows in the 1990s: case study of the Xiaojiang River basin in the upper reach of the Yangtze River	87
B. Tian, Y.Y. Wang, C.-D. Jan, Y. Hong, R.Y. Zou Impacts of rainfall on eroded sediment transport of debris flows: case study of the Xiaojiang River basin in the upper reach of the Yangtze River	91
Y.V. Gensiorovskiy, N.A. Kazakov, S.V. Rybalchenko Hydrometeorological conditions of the periods of mass debris-flow occurrence on Sakhalin Island	95
P.G. Davtyan, R.Kh. Gaginyan Connection of debris flow forming processes with droughts (case study of the Republic of Armenia)	99
M.D. Dokukin, A.M. Bagov, E.A. Savernyuk, S.V. Tolstel About the problem of the estimation of mudflow hazards during an epoch of glacial recession (case study of the mudflow basin of the left inflow of the Haznidon River in Kabardino-Balkaria)	102
E.V. Zaporozhchenko Mountain glaciation retreat in the Caucasus region of Russia as a factor of increase of the glacial debris flow activity	106
E.V. Zaporozhchenko, N.S. Kamenev, K.V. Korikov, N.Yu. Krasnyh, A.S. Nikulin Debris flow situation in the Bulungu-Su River basin as a reflection of hazards and threats, caused by the climatic changes in the high mountains	110
N.S. Kamenev, I.V. Galushkin, R.A. Tavasiyev Activisation of debris flow origination sites of the Northern Caucasus in connection with climate change: case study of the Tsey Gorge (Republic of North Ossetia - Alania, Russia)	114
N.K. Kononova, I.V. Malneva, I.B. Seynova Role of atmospheric processes in formation of debris flows in various areas of Russia	117
I.B. Seynova Climatic and glaciological conditions of debris flow formation in the Central Caucasus at a stage of regress of the Little Ice Age	121
M. Stoffel On the evolution of debris-flow occurrence in space and time – results from tree-ring analyses	125

L.K. Chen, F.C. Yu, S.C. Lin, C.H. Chang, Y.C. Lin, Y.T. Wang Characterization of typhoon rainfall and slopeland disaster in Taiwan	129
Part 5. Debris flow formation in different geographic environments	133
I.V. Bondyrev Analysis of the cryogenic formations as an instrument of mudflow forecasting and risk mitigation in the Caucasus	135
I.V. Bondyrev, E.D. Tsereteli, D.A. Kharitonashvili, T.T. Chaladze Debris flow processes in the northern part of Shida Kartli region (Georgia)	139
V.R. Boynagryan Debris flows in Armenia	143
Yu.V. Efremov, A.S. Chernyavskiy, A.V. Nicolaichuk, D.Yu. Schulyakov Debris flows in the Western and North-Western Caucasus	147
Yu.V. Efremov, A.V. Nicolaichuk, A.S. Chernyavskiy, D.Yu. Schulyakov Landslides and rock avalanches as triggers of debris flows in the North-Western Caucasus	151
B.G. Gaydarov Formation and distribution of debris flows on the territory of Dagestan	155
E.N. Kazakova, D.A. Bobrova Role of debris-flow processes in the formation of beaches on south-east coast of Sakhalin Island	158
V.K. Laperdin Factors of debris flow formation in the south of East Siberia	162
V.A. Lobkina, M.V. Mikhalev Formation and development of natural-anthropogenic debris flows and protection against them (case study of Makarovskiy district, Sakhalin)	166
I.M. Mamuchiev, O.L. Antonenko, R.A. Lyakhevich, K.A. Gegiev Debris flows in the Republic of Dagestan	170
A.N. Oliferov Features of debris flow formation in Crimea and the Carpathians	174
M.N. Petrushina, E.G. Suslova Landscape dynamics in the areas of debris flow impact in the Northern Caucasus	177
V.F. Perov Debris flow corrasion	181
E.D. Salukvadze Debris flow processes in the city of Tbilisi and its suburbs	185
R.S. Chalov, V.V. Surkov, N.N. Vinogradova, I.V. Krylenko Influence of debris flows on the formation of a mountain river channel and floodplain (case study of the Baksan River)	189
T.C. Chen, C.Y. Shu Topographic factors of debris flow stream induced by rainfall in Taiwan	192

Part 6. Methods for study of debris flows	197
A.H. Adzhiev, N.V. Kondratjeva, O.A. Kumukova, A.A. Gekiev Interrelation between debris flow activity and morphometric parameters of a basin	199
A.Y. Barinov Application of high-resolution remote sensing data for integrated study of debris flows	202
S. Zhang, N. Yu Infrasonic behaviour of debris flow and infrasonic warning device	206
H.M. Mashukov, V.H. Vorokov, M.M. Kambiev, A.V. Malbakhov, P.A. Yuritsin Method and arrangement for hazard identification of high-flood and torrent flows on rivers	210
M.N. Petrushina, A.M. Aleynikova, A.A. Aleynikov, O.I. Budarina Assessment of debris flow formation factors in the Adylsu valley (Central Caucasus)	214
T.L. Smoktunovich Underestimation of the importance of debris-flow topics in Russian school courses in the Geography	218
S.-Y. Chang, C.-P. Lin Debris flow characteristic interpretation using image processing techniques	222
Part 7. Debris flow modelling and mechanics	227
T.A. Vinogradova, Yu.B. Vinogradov Storm runoff in the catchment areas of debris flow origination sites: deterministic and deterministic-stochastic modelling	229
C. Graf, B.W. McArdell Simulation of debris flow runout before and after construction of mitigation measures: an example from the Swiss Alps	233
C.-D. Jan, J.S. Wang Empirical equations of rheological parameters for mixtures of gravels and mud slurries	237
R. Genevois, P.R. Tecca Debris flow hazard assessment in Dolomites: a simulation model approach	241
O.G. Natishvili, V.I. Tevzadze Hydraulic equations for cohesive debris flows and their particular solutions	245
O.G. Natishvili, V.I. Tevzadze Calculation of pressure, non-pressure and wave motions caused by the influence of debris flow on debris escapes	249
H.-T. Chou, Y.-Y. Chang Experimental study of landslide-induced debris flows and the mobilization process	253
B. Yu, S. Wang Determination of the density of a debris flow by its deposition	257
Part 8. Debris flow forecast	261
A.H. Adzhiev, N.V. Kondratjeva, O.A. Kumukova, I.B. Seynova, E.M. Bogachenko Background forecasting for debris flow hazard in the Central Caucasus: method and application results	263

B.O. Baymagambetov, R.K. Yafyazova The concept of super short-term forecast of debris flows	267
G.V. Gavardashvili Forecast of erosion processes in the Duruji River basin	270
G.V. Gavardashvili The specification of maximum discharge of debris flow on the Duruji River	274
I.V. Malneva Debris flow prediction system at different temporal and spatial scales	278
J. Xu, C. Yang, G. Zhang A study on the integrated regional meteorological forecast and warning model for geological hazards	282
C. Scheidl, D. Rickenmann About the mobility of debris flows using empirical runout prediction methods	286
Part 9. Debris flow hazard of glacial lakes	
	291
A.M. Bagov, M.D. Dokukin, E.A. Savernyuk, S.V. Tolstel Dynamics of glaciers and proglacial lakes in the headwaters of Birdzhalysu River and a possible design for protection against debris flows in the Dzhilysu resort (north-east flank of Mt. Elbrus)	293
Yu.A. Gnezdilov, N.Yu. Krasnykh Assessment of a hypothetical outburst of Lake Bashkara	297
V.G. Konovalov Remote sensing monitoring of the outburst-hazardous high mountain lakes in Pamir	301
I.N. Krylenko, V.V. Surkov, A.M. Tarbeeva, I.V. Krylenko Morphology of lake Syltran (Baksan River basin) and its potential outburst danger	305
D.A. Petrakov Debris flow hazard of glacial lakes and assessment of their outburst risk	309
A.N. Rudoy Ice-dammed lakes and glacial debris super-flows in the Altay and the Sayan Mountains in late Wurm: a review	313
Z. Cheng, C. Dang, J. Liu Debris flows induced by glacier lake bursts in southeastern Tibet, China	317
Part 10. Ice-water-rock flows	
	321
H.M. Mashukov, V.H. Vorokov, A.A. Bannikov, M.M. Kambiev, A.V. Malbakhov X.M. Results of annual inspections of the most dangerous sites along the path of the ice-rock mass after the Kolka Glacier collapse in 2002	323
V.L. Poznanin Failure of the Kolka Glacier and gliding mechanism of the formation of the ice-water-rock debris flow in 2002	327
V.L. Poznanin Inversion-functional structure and the cumulative mechanism of the catastrophic self-reproduction in the 2002 Genaldon debris flow	330

Part 11. Debris flow mitigation: design and application	333
C. Graf, B. Haller, R. Luis ROCCO® barrier systems for debris flows control	335
C. Graf, B. Haller, R. Luis Field observations in barrier systems against debris flows	339
R.V. Diakonidze, N.A. Labartkava, I.T. Pirtskhalaishvili Debris flows and protection of quality of water resources (case study of Georgia)	343
A.S. Yeszhanova Assessment of debris flow impact on environmental management in areas of debris flow hazard in the Ile Alatau	347
D.V. Znamensky Debris flow control in Brazilian tropical rain forest mountains	351
Stepanyan V.E., Bojnagryan V.R., Manukyan L.A., Gabrielyan V.V., Gyurgyan Y.G., Sngryan E.E. An integrated solution for ecological and industrial protection of disused tailings against debris flows in the Zangezour region of the Syunik marz area of Armenia	355
V.E. Stepanyan, V.R. Bojnagryan, V.V. Gabrielyan, E.E. Sngryan Redevelopment of the anti debris-flow engineering protection scheme for the territory of Idjevan City and justification of priority of construction of protection measures on the basis of risk levels	359
G. Fiebiger The theory of the Chain of Functions in debris flow control	363
G. Fiebiger Experiences with the Chain of Functions in debris flow control	367
M.M. Khadzhiev Assessment of debris flow hazard and protection measures for the federal road Baksan-Azau and the gas pipeline from Tegerek tala to Upper Baksan village	371
G.G. Chakhaia, L.N. Tsulukidze, I.V. Khubulava, Kh.L. Kiknadze, F.N. Lordkipanidze, M.R. Navrozashvili Research of phytomeliorative actions to prevent soil erosion, the provoking factor for the debris flow phenomena	375
List of authors	382
